DETAILED ACTION

Response to Amendment

1. In response to the Amendment received on February 20, 2008 the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 2.

Response to Arguments

2. Applicant's arguments, see Remarks/Amendment, filed February 20, 2008, with respect to claims 1-13 have been fully considered and are persuasive. The rejection of claims 1, 4-9 and 11-13 under 35 USC 102(b) as being anticipated by or, in the alternative, under 35 USC 103(a) as being unpatentable over Paulus et al (6,207,744) has been withdrawn. Applicant's amendment to the claims distinguishes the instantly claimed invention over the closet prior art made of record to Paulus et al. Paulus et al fails to teach a radiation curable aqueous, polyurethane emulsion prepared by a process comprising A) reacting as required components 1) from about 5 to about 45% by weight of an hydroxyl group containing unsaturated polyester acrylate having an OH number of from about 40 to about 200, 2) from about 5 to about 60% by weight of a polycarbonate having an OH number from about 28 to about 225, 3) from about 10 to about 20% by weight of a polyether diol having an OH number of from about 28 to about 225, with the proviso the if when 3) is present, the weight ratio of component 2) to component 3) is from about 0.5:1 to about 25:1, 4) from about 2 to about 8% by weight of a mono-hydroxy hydrophilic polyether, 5) from about 1 to about 8% by weight of one or more mono- or di-functional isocyanate-reactive compound that contains moieties selected from the group of cationic, anionic, potential cationic and potential anionic groups with, 6) from about 10 to about 30% by weight of one or more diisocyanates and/or polyisocyanates; B) optionally converting any potential cationic or anionic groups into cationic or anionic groups by salt formation, and (C) forming a dispersion of the reaction products of 1) thru 6) in water and reacting said dispersion with 7) from about 0.1 to about 3% by weight of one or more diamines and/or polyamines, wherein the weight percents of 1) thru 7) total 100% and the equivalent ratio of isocyanate groups in component 6) to the sum of components 1), 2), 3), 4), and 5) is from about 1.2:1 to about 2.0:1.

Election/Restrictions

Claims 1 and 3-13 are allowable. The restriction requirement between groups I and II, as set forth in the Office action mailed on June 27, 2007, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 14-15,

directed to a method of preparing a cured coating composition comprising the instantly claimed aqueous polyurethane emulsion no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, and 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1 and 3-15 allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art, alone or in combination, fails to teach and/or render obvious the method of preparing a radiation curable aqueous polyurethane emulsion. Nor does the prior art teach, alone or in combination, using said prepared radiation curable aqueous polyurethane emulsion in coating methods.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
